

Drawing Creatures of the Sea

Today's story of 'Commotion in the Ocean' featured lots of different creatures who live under the sea. Try drawing some of them. Think of the features they have. For example the lobsters had claws, the shark had sharp teeth and the octopus had eight legs.

Draw where they may live. In a cave? In a coral reef? In a shipwreck?

Lastly, make a story of your own and illustrate it. The story does not need to be written, your child can tell you with their words, however I would like them to illustrate what happens.
